# Lavitalebela, Ferretti 780

At a length of 24 meters, Lavitalebela offers a completely innovative layout; considering her internal details that guarantee ample space, she also presents refined finishes in teak wood compared to the traditional cherry wood that is normally adopted for a yacht this size.

The designers' decision to integrate the access ladder to the top deck within the wall structure of the yacht offers a continual visual solution from the rear deck facing the bow-thus enlarging the space dedicated to the conversation area featuring double sofa of contemporary design.

Light colored finishes highlight the spirit of the boat, while large windows structures allow to live in close contact with the sea, rendering the Master cabin and the toilet area an environment of great elegance to enjoy in full contact with sea. Thanks to the introduction of the rear garage, covered in teak, Lavitalebela offers many opportunities to take advantage of the open space, giving an easy access to the sea.
