Description

The SIMAN ENZO 50M is a steel and aluminium Tri-deck Displacement Superyacht currently being built in Italy to the highest standards and with delivery in spring 2024.

At 162' 10" in overall length, she boasts vast volumes across her 4 decks for a gross tonnage of 499 GT thanks to a remarkably wide beam of over 30'. She accommodates in comfort and style up to 12 guests in 6 en-suite staterooms comprising of a beam-wide main deck Master suite, an upper deck VIP cabin and further 2 doubles and 2 twins on the lower deck. Additional accommodation is provided for 11 crewmembers with the Captain's cabin on the bridge deck.

All modern features are included in this new construction motor yacht, including zero speed fin stabilizer system, tender garage for 2 + 1 water scooter, hard top and 2 pools.

Powered by twin 1450 Hp CAT Diesel engines, she can reach a top speed of 15 knots, while she comfortably cruises at 10 knots for an impressive range of 4000 nautical miles.

The SIMAN ENZO 50M is a yacht with an innovative design to live life on board in a more informal way, with ample outdoor areas to offer undisturbed views, in close contact with the sea and nature.

The high-quality Italian yard focused on the importance of a functional design, which incorporates Bauhaus concepts from the early 1900s:

"the search to make the lines coincide with the functionality of the vessel, finding a balance between the useful and the beautiful". – Horacio Bozzo (Yacht Designer).
