Description

32.3m Sanlorenzo SL106A Motor Yacht for Sale.

Delivered right before the 2023 summer season, this 32.3m SANLORENZO SL106 ASYMMETRIC motor yacht for sale, was designed by Zuccon International Project and her naval architecture was developed by Sanlorenzo. Although always used private, the yacht is prepared to be Commercially registered in Malta.

With the aim of obtaining greater usability of the interior spaces, and better access to the exterior, the Asymmetric models push usable interior space out to the full beam on port side, where there's no traditional side deck. There is still a side deck to starboard, and the twin stairways leading from the swim platform to the main deck aft.

Thanks to this asymmetrical layout, the main deck not only benefits from a larger surface area of 10 m2, but also features a spacious dining area on port side with a full-height window with sole-to-ceiling glass that merges with hull, offering a continuous and homogeneous surface and overlooking the sea. A vast lounge/saloon area on starboard side benefits from a folding terrace.

The bow area offers a 20 m2 space with integrated sun loungers and a convertible dinette, and can be reached through a dedicated access from the almost 30 m2 Owner's cabin. The fully customised flybridge, of approximately 60 m2, is connected to the foredeck.

This SANLORENZO SL106 ASYMMETRIC comfortably accommodates 11 guests in 5 en-suite staterooms, each with state-of-the-art entertainment systems and amenities.

The main deck forward Master stateroom also feels airy because of a rectangular window forward, directly over the bed. This stateroom has a door to the starboard-side deck. Push a button, and there's access to the foredeck settee with a table for a private breakfast or snack. A few steps up on the port side are a sunpad and the stairs to the flybridge.

Three double VIP cabins and a twin cabin with additional Pullman bed on the lower deck, complete the guest accommodation aboard. Three additional crew cabins with integrated facilities are located towards the bow on the lower deck, with an intelligent access to favour maximum privacy.

With low hours, this SANLORENZO SL106A is powered by twin 2434 Hp MTU engines, providing a maximum speed of 28 knots, a cruise speed of 24 knots, and an economical speed of 10 knots for a maximum range of 1280 nautical miles.

With full options including underway and at anchor stabilization, early viewings on this immediate delivery SANLORENZO SL106 ASYMMETRIC, are highly encouraged.
